

QUIZ: sist

Course: SIS102
Time Limit: 30 minutes

Name: _____ Date: _____

Instructions:

- Read each question carefully
- Choose the BEST answer for each question
- Mark your answers clearly

1. What is the primary source of the most elusive threats to an organization?

- A. External hackers
- B. Internal employees
- C. Natural disasters
- D. Physical breaches

2. What is the main goal of ransomware attackers?

- A. To steal sensitive information
- B. To disrupt business operations
- C. To demand a ransom in exchange for decrypted files
- D. To install malware on a device

3. What type of insiders intentionally harm the company?

- A. Accidental insiders
- B. Negligent insiders
- C. Malicious insiders
- D. Unintentional insiders

4. What is a common way for ransomware to spread?

- A. Through physical breaches
- B. Through phishing emails
- C. Through natural disasters
- D. Through social engineering attacks only

5. What is a technical control that can help prevent insider threats?

- A. Regular employee meetings
- B. Access management and user behavior analytics
- C. Employee background checks
- D. Social media monitoring

6. What is double extortion in the context of ransomware?

- A. Demanding a higher ransom
- B. Threatening to release sensitive stolen data if the ransom is not paid
- C. Stealing sensitive information
- D. Installing malware on a device

7. What is a foundational cybersecurity measure to protect against ransomware?

- A. Regular employee training
- B. Robust endpoint security solutions
- C. Regular software updates
- D. All of the above

8. What is an example of a specific ransomware countermeasure?

- A. Immutable storage architectures
- B. Regular employee meetings
- C. Social media monitoring
- D. Employee background checks

9. What is the primary goal of threat intelligence services?

- A. To prevent insider threats
- B. To protect against ransomware
- C. To provide information about potential threats
- D. To install malware on a device

10. What is the result of an accidental insider falling victim to a phishing attack?

- A. Malicious intent
- B. Negligence
- C. Unintentional harm
- D. Revenge

11. What is a way to encourage employees to report suspicious activities?

- A. Regular employee meetings
- B. A culture of security awareness
- C. Social media monitoring
- D. Employee background checks

12. What is a common form of payment demanded by ransomware attackers?

- A. Cash
- B. Credit cards
- C. Cryptocurrency
- D. Checks

13. What is the term for restricting administrative privileges to prevent ransomware attacks?

- A. Network segmentation
- B. Application whitelisting
- C. Immutable storage architectures
- D. Restricting administrative privileges

14. What is the purpose of incident response in the context of ransomware attacks?

- A. To prevent insider threats
- B. To protect against ransomware
- C. To respond quickly to ransomware attacks
- D. To install malware on a device

15. What is the result of not paying the ransom in a double extortion scenario?

- A. The attackers will delete the stolen data
- B. The attackers will not release the stolen data
- C. The attackers will release the stolen data
- D. The attackers will increase the ransom demand

16. What is the term for a strategy that combines general malware defenses with ransomware-specific tactics?

- A. Defense in Depth
- B. Threat intelligence services
- C. Incident response
- D. Threat hunting activities

17. What is the primary benefit of using end-to-end encryption?

- A. To prevent insider threats
- B. To protect against ransomware
- C. To ensure the confidentiality and integrity of data
- D. To install malware on a device

18. What is the result of an organization having a culture of security awareness?

- A. Increased risk of insider threats
- B. Decreased risk of ransomware attacks

- C. Improved employee morale
- D. Increased employee reporting of suspicious activities

19. What is the term for the process of identifying and mitigating potential security threats?

- A. Threat intelligence services
- B. Incident response
- C. Threat hunting activities
- D. Vulnerability assessment

20. What is the primary goal of robust endpoint security solutions?

- A. To prevent insider threats
- B. To protect against ransomware
- C. To detect and respond to malware
- D. To install malware on a device
